

You will need to have an accurate birth date, place, and time. If you don't have an accurate birth time and place, the chart won't make sense to you. If you are unsure of your birth time, the first place to check is your birth certificate. Different states have different standards, so it is not a sure thing. Next, I would check with a relative or the hospital where you were born. Lastly, a good Rectification astrologer can help.
